

1. Emulsions made with tweens are usually
  - (A) unstable
  - (B) w/o
  - (C) o/w
  - (D) clear
  
2. The two major properties of drugs that are usually modified by complexation are
  - (A) Odour and taste
  - (B) Taste and solubility
  - (C) Chemical structure and stability
  - (D) Stability and solubility
  
3. pH is
  - (A) not temperature dependent
  - (B) a measure of acidity
  - (C) the same as pOH
  - (D) high for acids
  
4. In radiopharmacy the term “ rem” means
  - (A) Radiation per millisecond
  - (B) Radiations per minute
  - (C) Roentgen – equivalent –man
  - (D) Roentgen exposure per minute
  
5. Pharmacists should caution patients who are taking niacin that this drug
  - (A) Stains the urine bright red
  - (B) Causes ringing in the ears
  - (C) Causes muscular weakness
  - (D) Should be taken with meals.
  
6. First order half life is equal to
  - (A)  $1/k$
  - (B)  $K$
  - (C)  $0.693/k$
  - (D)  $2k+1$

7. The major mechanism of degradation of drugs in the GIT is
- (A) Oxidation
  - (B) Hydrolysis
  - (C) Acetylation
  - (D) Reduction
8. A rich source of Vitamin A is
- (A) Lean meat
  - (B) Bread
  - (C) Liver
  - (D) Fish liver oil
9. Tablet hardness range is normally
- (A) 0.2 – 0.5 kg
  - (B) 0.5 – 1.0 kg
  - (C) 1.0 – 2.0 kg
  - (D) 3.5 – 7.0 kg
10. Reaction rate is increased most readily by
- (A) Humidity
  - (B) High temperature
  - (C) Freezing
  - (D) Photolysis
11. Purified water USP may not be used in
- (A) syrups
  - (B) topical preparations
  - (C) parenteral preparations
  - (D) elixirs
12. Ferritin is a (an)
- (A) Vitamin
  - (B) Micelle
  - (C) Emulsion
  - (D) Protein

13. Cocoa butter (theobroma oil) is useful as a suppository base because of its
- (A) Solubility
  - (B) Melting point
  - (C) Miscibility
  - (D) Reactivity
14. GMP regulations are promulgated and revised by
- (A) State board of pharmacy
  - (B) The DEA
  - (C) The FDA
  - (D) The EPA
15. Cromolyn sodium is useful in asthma only in the form of
- (A) Oral tablets
  - (B) Enteric coated tablets
  - (C) Inhalation
  - (D) IV injection
16. Aloes are used to treat
- (A) Burns
  - (B) Gastritis
  - (C) Blood dyscrasias
  - (D) Vertigo
17. A buffer equation is also known as
- (A) Youngs equation
  - (B) Charles law
  - (C) Henderson-Hasselbalch equation
  - (D) Stokes law
18. A popular theory of acids and bases is
- (A) Boyle's law
  - (B) Bronsted Lowry theory
  - (C) Henry's theory
  - (D) Humors theory

19. Freeze drying is based on
- (A) Pressure filtration
  - (B) Sublimation
  - (C) Polymerization
  - (D) Pasteurization
20. Mineral oil exerts laxative action primarily by
- (A) Bulk formation
  - (B) Fecal softening
  - (C) Catharsis
  - (D) Lubrication
21. Gums are used in tableting primarily as
- (A) Disintegrators
  - (B) Glidant
  - (C) Lubricants
  - (D) Binding agents
22. Spans and Tweens are
- (A) Highly polymerized mannuronic acid anhydrides
  - (B) Phospholipids
  - (C) Polyoxyalkalene derivatives
  - (D) Glycosides
23. Vitamin K is associated with
- (A) Pellagra
  - (B) Nerves
  - (C) Hemoglobin concentration
  - (D) Blood clotting
24. The latin *oculo utro* is translated to mean
- (A) Right eye
  - (B) Each eye
  - (C) Left eye
  - (D) Each year

25. Limulus test is relatively a method for testing
- (A) Pyrogen
  - (B) Microbial growth
  - (C) Acidity
  - (D) Creaming
26. Milk of Magnesia is
- (A) Magnesium trisilicate
  - (B) Magnesium carbonate
  - (C) Magnesium hydroxide
  - (D) Magnesium phosphate
27. Hydrogen peroxide is used as
- (A) Strong oxidising agent
  - (B) Strong reducing agent
  - (C) Weak acidifying agent
  - (D) Strong acidifying agent
28. Yellow mercuric oxide is assayed by
- (A) Complexometric titration
  - (B) Precipitation titration
  - (C) Argentometric method
  - (D) Oxidation reduction
29. Molecular formula of Alum is
- (A)  $KAl(SO_4)_2 \cdot 12H_2O$
  - (B)  $KAl(SO_4)_2 \cdot 7H_2O$
  - (C)  $KAl(SO_4)_4 \cdot 5H_2O$
  - (D)  $KAl(SO_4)_2 \cdot 3H_2O$
30. Sublimed sulphur is also known as
- (A) Sulphur dioxide
  - (B) Precipitated sulphur
  - (C) Flower of sulphur
  - (D) Sulphur ointment

31. Limit Test for iron is based on the reaction of
- (A) Ammoniacal solution of iron in presence of citric acid with acetic acid.
  - (B) Ammoniacal solution of iron in presence of citric acid with thioglycolic acid.
  - (C) Ammoniacal solution of iron in presence of citric acid with sulphuric acid.
  - (D) Ammoniacal solution of iron in presence of citric acid with silver nitrate.
32. Sodium fluoride is assayed by
- (A) UV Spectroscopic method
  - (B) Complexometric titration
  - (C) Gravimetric method
  - (D) Acid base titration
33. An example of Radio-opaque contrast media is
- (A) Barium Sulphate
  - (B) Sodium Chloride Na-24 solution
  - (C) Sodium Phosphate P-32
  - (D) Ferric Citrate Fe-59 solution
34. Gutzeit test is followed in
- (A) Limit Test for lead
  - (B) Limit Test for chloride
  - (C) Limit Test for arsenic
  - (D) Limit Test for sulphate
35. In Boric acid assay following reagent is used :
- (A) Silver Nitrate
  - (B) Borax
  - (C) Glycerol
  - (D) Hydrochloric Acid
36. Lugol's solution is
- (A) Strong iodine solution
  - (B) Weak iodine solution
  - (C) Alcoholic iodine solution
  - (D) Aqueous iodine solution

37. Antichlor is the synonym of
- (A) Sodium thiosulphate
  - (B) Sodium phosphate
  - (C) Sodium metabisulphate
  - (D) Sodium hydroxide
38. Antimony potassium tartrate is assayed by using
- (A)  $\text{KMnO}_4$  solution used as precipitating agent.
  - (B) Iodine solution used as oxidising agent.
  - (C)  $\text{H}_2\text{O}_2$  solution used as reducing agent.
  - (D) Thioglycolic acid as reducing agent.
39. Antidote used for cyanide poisoning is
- (A) Copper Sulphate
  - (B) Silver nitrate
  - (C) Kaoline
  - (D) Sodium nitrite
40. Bismuth subcarbonate is used as
- (A) Protective and adsorbents
  - (B) Sensitising agent
  - (C) antacid
  - (D) cleansing agent
41. Tetracycline structure contains the following skeleton :
- (A) Tetrahydro naphthacene
  - (B) Dihydro naphthacene
  - (C) Pentahydro naphthacene
  - (D) Octahydro naphthacene
42. Tolbutamide is a
- (A) Antimicrobial agent
  - (B) Analgesic
  - (C) Hypoglycemic agent
  - (D) Sedative

43. Chemically Metronidazole is
- (A) 2-Ethyl-5-nitro-1H-imidazole-1-ethanol.
  - (B) 2-Methyl-5-nitro-1H-imidazole-1-ethanol.
  - (C) 2-Methyl-3-nitro-1H-imidazole-1-ethanol.
  - (D) 2-Ethyl-3-nitro-1H-imidazole-1-ethanol.
44. Furosemide is a
- (A) Sulfonyl benzoic acid derivative.
  - (B) Xanthine derivative.
  - (C) Potassium sparing diuretic.
  - (D) Carbonic anhydrase inhibitor.
45. An example of reversible anti cholinesterase drug is
- (A) Parathion
  - (B) Atropine
  - (C) Neostigmine
  - (D) Scopolamine
46. Chemically Indomethacin is
- (A) 1-(p-Chlorobenzoyl)-5-methoxy-2-methylindole-3 acetic acid.
  - (B) 1-(m-Chlorobenzoyl)-5-methoxy-2-methylindole-3 acetic acid.
  - (C) 1-(p-Chlorobenzoyl)-5-ethoxy-2-methylindole-3 acetic acid.
  - (D) 1-(m-Chlorobenzoyl)-5-ethoxy-2-methylindole-3 acetic acid.
47. Imipramine hydrochloride is
- (A) Selective norepinephrine reuptake inhibitors.
  - (B) An tricyclic antidepressant.
  - (C) Selective serotonin inhibitor.
  - (D)  $\alpha_2$  antagonist.
48. A long acting barbiturate is
- (A) Amobarbital
  - (B) Pentobarbital
  - (C) Thiopentone
  - (D) Phenobarbital

49. An anticancer antibiotic is
- (A) Mercaptopurine
  - (B) Prednisolone
  - (C) Daunorubicin
  - (D) Hydrocortisone
50. Penicillinase resistant penicillin is
- (A) Ampicillin
  - (B) Cloxacillin
  - (C) Penicillin V
  - (D) Penicillin G
51. Haloperidol is
- (A) Benzamide derivative
  - (B) Fluorobutyrophenone derivative
  - (C) Hydantoins
  - (D) Oxazolidone derivative
52. Amphotericin B is
- (A) Polyene antibiotic
  - (B) Macrolide antibiotic
  - (C) Aminoglycoside
  - (D) Tetracycline
53. An example of sympathomimetic drug with mixed mechanism of action
- (A) Amphetamine
  - (B) Clonidine
  - (C) Ephedrine
  - (D) Propranolol
54. Chemically Dapsone is
- (A) 4,4'-sulfonylbisbenzeneamine
  - (B) 4,2'-sulfonylbisbenzeneamine
  - (C) 4-sulfonylbisbenzeneamine
  - (D) 4,4'-sulfonylbisbenzeneamide

55. Diphenhydramine is
- (A) Ethylenediamine derivative
  - (B) Amino alkyl ether derivative
  - (C) Propylamine derivative
  - (D) Phenothiazine derivative
56. The volume of air in a normal breath is called
- (A) total lungs capacity
  - (B) vital capacity
  - (C) tidal volume
  - (D) residual volume
57. Heredity deficiencies of coagulation is referred to as
- (A) Anemia
  - (B) Hemophilia
  - (C) Hemolysis
  - (D) Leukemia
58. Urine is expelled from the bladder by
- (A) Excretion
  - (B) Defecation
  - (C) Micturition
  - (D) Filtration
59. Which of the followings belongs to the middle ear ?
- (A) Cochlea
  - (B) Ossicles
  - (C) Ampullae
  - (D) Vestibule
60. Bile is released by the mediation of the following hormone :
- (A) Gastrin
  - (B) Secretin
  - (C) Cholecystokinin
  - (D) Enterokinin

61. Vomiting centre is located in
- (A) Cervical spinal cord
  - (B) Thalamus
  - (C) Hypothalamus
  - (D) Medulla Oblongata
62. Active reabsorption of glucose occurs in
- (A) Proximal tubule
  - (B) Loop of henle
  - (C) Distal tubule
  - (D) Collecting duct
63. Crohn's disease is a disease of the
- (A) brain
  - (B) spinal cord
  - (C) stomach
  - (D) colon
64. Stretching of the renal juxtaglomerular apparatus
- (A) Dipeptidase
  - (B) Renin
  - (C) Bradykininase
  - (D) Phosphatase
65. Destruction of which of the following structures is the usual cause of Parkinson's disease ?
- (A) Subthalamus nucleus
  - (B) Putamen
  - (C) Substantia nigra
  - (D) Globus pallidus
66. The term hematocrit means the percentage of the
- (A) Blood that is RBC
  - (B) Blood that is plasma
  - (C) Blood volume to the extra cellular space
  - (D) New blood formed every 120 days

67. The most frequent cause of angina pectoris is
- (A) Coronary atherosclerosis
  - (B) Coronary insufficiency
  - (C) Cardiac fibrillation
  - (D) Cardiac Congestion
68. Movement of bone toward the midline called as
- (A) Adduction
  - (B) Abduction
  - (C) Extension
  - (D) Flexion
69. The layer closer to the brain among the meninges is
- (A) Duramater
  - (B) Arachnoid mater
  - (C) Pia mater
  - (D) Falx cerebri
70. An Immunological response against a person's own tissue antigens is known as
- (A) Resistance
  - (B) Auto immunity
  - (C) Homoeostasis
  - (D) Adaptation
71. Normal life-span of RBCs in human body is
- (A) 30 days
  - (B) 90 days
  - (C) 120 days
  - (D) 60 days
72. Stuart prower factor is factor
- (A) VII
  - (B) IX
  - (C) X
  - (D) XII

73. Urinary ammonia is produced in
- (A) Spleen
  - (B) Liver
  - (C) Kidney
  - (D) Blood
74. Insulin and which of the following hormones are secreted from the Islets of the pancreas ?
- (A) Trypsin
  - (B) Glucose
  - (C) Glucagon
  - (D) Luteinising hormone
75. A substance commonly used to measure renal blood flow is
- (A) Glucose
  - (B) Inulin
  - (C) Para- aminohippuric acid
  - (D) PABA
76. Which of the following substances is the source of energy in nerve fibers ?
- (A) Amino acids
  - (B) Glucose
  - (C) Lipids
  - (D) Proteins
77. During muscle contraction  $\text{Ca}^{++}$  binds with
- (A) Myosin
  - (B) Troponin
  - (C) Actin
  - (D) Tropomyosin
78. The overall regulating organ for neuroendocrine is
- (A) Pituitary
  - (B) Hypothalamus
  - (C) Pineal gland
  - (D) Thymus gland

79. The most important functional process that the neurophils and monocytes carry out is
- (A) Phagocytosis
  - (B) Tachy phylaxis
  - (C) Urea absorption
  - (D) Glucose entry
80. Osmotic pressure of plasma is mainly maintained by
- (A)  $\alpha$  – globulin
  - (B)  $\beta$  – globulin
  - (C)  $\gamma$  – globulin
  - (D) Albumin
81. The first drug of choice for streptococcus viridians endocarditis is
- (A) Penicillin + Gentamicin
  - (B) Vancomycin
  - (C) Ceftriaxone
  - (D) Chloramphenicol
82. Which of the following is not a betalactam antibiotic ?
- (A) Penicillin
  - (B) Ampicillin
  - (C) Cephalosporine
  - (D) Capreomycin
83. In a pregnant patient with gonorrhoea, the drug of choice is ?
- (A) Ceftriaxone
  - (B) Spectinomycin
  - (C) Clindamycin
  - (D) Ciprofloxacin
84. Among antitubular agent, the most potent hepatic enzyme inducer is
- (A) INH
  - (B) Rifampicin
  - (C) Cycloserine
  - (D) Ethambutol

- 85.** The single agent used in the treatment of testicular/ ovarian tumors is
- (A) Cyclophosphamide
  - (B) Cisplatin
  - (C) Vincristine
  - (D) Methotrexate
- 86.** Pulmonary blood flow is determined by
- (A) Radioactive cobalt
  - (B) Barium sulphate
  - (C) Rubidium sulphate
  - (D) None of the above
- 87.** Chloramphenicol inhibit the protein synthesis by
- (A) Preventing binding of aminoacyl tRNA
  - (B) Inhibiting translocation
  - (C) Inhibiting peptidyl transferase activity
  - (D) None of the above
- 88.** Drug Information Services Division in hospital pharmacy does not
- (A) Provide drug information on drugs and drug therapy to hospital staff.
  - (B) Maintain the drug information center.
  - (C) Prepare the hospital's pharmacy newsletter
  - (D) Diagnose the disease
- 89.** The potential benefits of a formulary system are
- (A) Therapeutic
  - (B) Economic
  - (C) Educational
  - (D) All of the above

90. Medication orders should not include
- (A) Patient's name and location
  - (B) Signature of the nurse
  - (C) Frequency of administration.
  - (D) Route of administration.
91. Which of the following drug should not be taken with milk or other dairy products ?
- (A) Roxithromycin
  - (B) Amoxicillin
  - (C) Tetracycline
  - (D) Clarithromycin
92. The arrangement of the drugs in hospital pharmacy is done by the following methods except
- (A) Alphabetical method
  - (B) Therapeutic category
  - (C) Dosage form
  - (D) Arranged according to company name
93. Bioavailability of the drugs is more when it is administered by
- (A) Intramuscularly
  - (B) Orally
  - (C) Intravenously
  - (D) Subcutaneously
94. Which of the following factor can affect the bioavailability of drugs ?
- (A) pH of stomach
  - (B) GI blood flow
  - (C) Molecular size of drug
  - (D) All of the above

95. High blood sugar produces the classical symptoms like
- (A) Polyuria
  - (B) Polydipsia
  - (C) Polyphagia
  - (D) All of the above
96. A written offer to do a work or to provide a material at a given price within a prescribed period or conditions is
- (A) Contract
  - (B) Tender
  - (C) Budget
  - (D) Agreement
97. The power to fix the maximum sale price of indigenously manufacture bulk drugs lies with
- (A) Government
  - (B) Purchaser
  - (C) Seller
  - (D) Customer
98. The size of the order which gives maximum economy in purchasing any material is
- (A) Economic ordering quality
  - (B) Economic ordering quotation
  - (C) Economic ordering quantity
  - (D) Economic ordering equation
99. Sales promotion techniques are not used for
- (A) Introduction of new products
  - (B) Creating new customers
  - (C) Creating slack season
  - (D) Building public image

- 100.** Halsey Premium Plan is based on
- (A) Time and money
  - (B) Time and demand
  - (C) Time and speed
  - (D) Time and product
- 101.** The system of wage payment under which earning differs at different levels of a output is under
- (A) Bedeaux's plan
  - (B) Emerson's plan
  - (C) Gantt's plan
  - (D) Taylor's plan
- 102.** The shares that provides capital on permanent basis to the company is
- (A) Equity share
  - (B) Preference share
  - (C) Debentures
  - (D) Bonds
- 103.** The total trading income from cash sales and credit sales is
- (A) loss
  - (B) capital
  - (C) voucher
  - (D) turnover
- 104.** Entire drug management can be assessed based on
- (A) Total expenditure on drugs and medicines (per capita average)
  - (B) Government expenditure on drugs (per capita average)
  - (C) Private expenditure on drugs (per capita average)
  - (D) All of the above

105. The WHO, in partnership with \_\_\_\_\_, United Nations Population Fund (UNFPA) and the World Bank, has drawn on a common bank of extensive experience to produce “Operational Principles for Good Pharmaceutical Procurement”.
- (A) UNICEF
  - (B) UNESCOMB
  - (C) UNIPRO
  - (D) UCLA
106. Stoma surrounded by varying number of subsidiary cells resembling other epidermal cells is present in
- (A) Senna
  - (B) Digitalis
  - (C) Datura
  - (D) Peppermint
107. The method of bark collection wherein which the plant is allowed to grow for a definite period and then cut off at specific distance from the soil is
- (A) Felling
  - (B) Uprooting
  - (C) Pruning
  - (D) Coppicing
108. The moisture content of a drug is determined by heating in an oven to constant weight at
- (A) 105° C
  - (B) 115° C
  - (C) 85° C
  - (D) 75° C
109. Paraffin wax tinged yellow and substituted for yellow bees wax is one of the following types of adulteration :
- (A) Substitution by sub-standard commercial variety
  - (B) Substitution by artificially manufactured substitutes
  - (C) Substitution with superficially similar but inferior drugs
  - (D) Substitution with exhausted drug

- 110.** The parts of the organ or organs other than those named in the definition and description of the drug are defined as
- (A) Crude fiber
  - (B) Swelling index
  - (C) Foreign inorganic matter
  - (D) Foreign organic matter
- 111.** Hager's reagent is
- (A) Potassium mercuric iodide solution
  - (B) Potassium bismuth iodide solution
  - (C) Iodine and potassium iodide solution
  - (D) Saturated solution of picric acid
- 112.** The terpenoid Cineole is present in
- (A) Geranium oil
  - (B) Caraway oil
  - (C) Eucalyptus oil
  - (D) Peppermint oil
- 113.** The plant constituents having an astringent taste are
- (A) Volatile oil
  - (B) Carbohydrates
  - (C) Tannins
  - (D) Alkaloids
- 114.** The drug which belongs to the class of laxatives is
- (A) Catechu
  - (B) Vinca
  - (C) Gokhru
  - (D) Aloe
- 115.** Isabgol husk preparation factory is located in
- (A) Gujarat
  - (B) Rajasthan
  - (C) Andhra Pradesh
  - (D) Tamil Nadu

- 116.** Arjuna is used as
- (A) Purgative
  - (B) Cardiotonic
  - (C) Antidiabetic
  - (D) Antitumour
- 117.** Shogaol is an important constituent of
- (A) Linseed
  - (B) Aloe
  - (C) Ginger
  - (D) Eucalyptus
- 118.** The drug which is used in the prophylaxis of malaria is
- (A) Cinnamon
  - (B) Castor
  - (C) Clove
  - (D) Cinchona
- 119.** The drugs which have stimulant effects on the motility of the uterus are known as
- (A) Oxytocins
  - (B) Diuretics
  - (C) Carminatives
  - (D) Laxatives
- 120.** Cuprea bark is the adulterant of
- (A) Cinnamon
  - (B) Cinchona
  - (C) Kurchi
  - (D) Cascara

## Space For Rough Work
